

The small performance class up to 2 tons is characterized by an impressive range of models and options. 3 different dump body variants such as front tip, swivel tip and high tip, as well as individual equipment options such as narrow tyres for the 1001, 2-wheel drive for the 1601 and loader unit for the 2001, cover all fields of application. The maintenance-free and user-friendly permanent hydrostatic four-wheel drive system (except 1601) ensures excellent off-road traction. All models have a spacious and functional central control console, which also offers optimal protection for the operator.

Key features	Leaflet & data sheet	Application
standard / option		Swivel / high tip
payload kg		1500
unladen weight kg		1320
diesel engine type		Yanmar
diesel engine output kW / HP (Iso 3046/1)		17 / 23,1
speed km/h		0 - 16
steering angle °		+/- 33
oscillation °		+/- 15
turning radius outside mm		3300
gradeability %		50
drive		Twin-Lock
dimensions (L x W x H)		3300 x 1310 x 2000
Standard skip - struck (ltr)		650
Standard skip - heaped (ltr)		800
