Leica Rugby To build a Powerful Team

Easy to Use

Three Great Leica Rugby

User Friendly

The large, backlit, graphic display provides the user with a simple to use and easy to understand interface. (Leica Rugby 280DG shown)

Easy Grade Entry

Select the axis, then press Up or Down to enter the required grade. Press Star button to enter higher grades by digit.

Beam Masking

Turns off the laser diode on up to three sides to prevent unwanted disturbances

Full Function Remote Control

The Leica Rugby 280DG is available with a remote to change all functions up to 100 m (330 ft)

Lock Mode

Grade changes can be locked in the menu to prevent unwanted changes

Battery Status

The battery status is always shown for the user's reference to keep you working

Height of Instrument

The Rugby monitors level and alerts the user if it has moved or has been bumped

Selectable Head Speeds

Head speed or scan mode (Rugby 280DG) are easily set to match your needs

Easy to use menu

Press the Star button to open the menu and change settings

Leica Rugby 260SG A highly accurate, grade capability.

The Rugby 260SG is a rugged general construction grade readout and semi-automatic grade

Leica Rugby 270SG A fully automatic,

The Rugby 270SG is a fully automatic, single station contractor that needs a level or single septic installation, trenching and more.

Leica Rugby 280SG A fully automatic, vertical and dual interior applications.

The Rugby 280DG is a fully automatic, dual grade plumb beam, scan leveling, plus dual station with a two-way remote in any construction

Lasers!

Make the Right Choice

The Leica Rugby 260SG, 270SG and 280DG offer the contractor a real choice of features and functionality.

Quality that Counts

Why do we call our laser a Leica Rugby?

Like the game of Rugby, if you want to play, you have to be tough.

Known for years as the best quality in surveying instruments, the Leica Geosystems name stands for the highest level of quality, reliability and durability. The Leica Geosystems standard is built in to every Leica Rugby we produce.

The Leica Rugby has a high impact, glass filled housing, a solid metal base and it is 100% waterproof; which makes the Rugby the toughest and most durable laser in the industry.

The Leica Rugby laser has created a new standard in laser technology. A standard that others can only strive to match, but cannot compare.

Known not only for great products, the Leica Geosystems worldwide service organization is fully trained and authorized by the factory.

The quality of Leica Geosystems is backed by a full two-year warranty with knockdown protection. A five year program is available from your dealer when you buy your laser.
